## Product Transfer Form

This form allows retailers to transfer tobacco or vapor products from one store to another within their business. A copy of this transfer form should be kept on file at the originating tobacco location with the original invoices that show the product was legally purchased at that location and then transferred out to another location. In addition, the transfer form must be kept on file at the new sales location along with copies of the invoices from the original store to verify that the product was purchased and transferred legally to the store. You must maintain your invoices and transfer forms on file for at least 3 years in both locations.
